

+ Care and Maintenance Instructions for
PORCELAIN CERAMIC

Shaping inspiration

**ROSSKOPF
+ PARTNER**

Porcelain ceramic has high density, homogeneous surface. The material is characterized by its alkali and chemical resistance; it is colour-fast and is of high-quality genuine-looking colour; it is easy to clean, fireproof and highly resistant to scratches. To ensure that you enjoy your product for a long time, please pay attention to the following instructions for care.

DAILY CLEANING

Removing light stains and marks:

Use a damp cloth and a neutral detergent, e.g. all-purpose cleaner, glass cleaner (alcohol-based and without silicones), or a mild vinegar cleaner. Rinse the cleaners away afterward with clean water.

BASIC CLEANING + INTENSIVE CLEANING

Removing stubborn dirt and dried-on stains:

Use a low-abrasive scouring pad (rough side without metal content). First remove encrustations with a plastic scraper avoiding high pressure in any one place. Always add sufficient liquid (water); never use an undiluted scouring agent.

1. Wash the worktop over a large area with warm water (avoid high rubbing pressure on any one point).
2. Rinse afterward with clear water.
3. Dry the surface with a clean, soft cloth or kitchen paper.

ADDITIONAL TIPS

- Do not use strong scouring or bleaching agents, colourants, battery acid, aggressive solvents, stains, hydrofluoric acid, Dichloromethane, caustic soda, paint remover or anything similar.
- If possible, use a cutting board for cutting work.
- For hot pots and pans, please use coasters.
- Acrylic or nitro-based paints or text highlighters can cause lasting discoloration.

OUR RECOMMENDATION

ROSSKOPF + PARTNER Cleaning Set (2 microfiber cloths, 1 cleaning sponge, 500 ml Pro-Siro® Maintenance Cleaner Active, 500 ml Pro-Siro® Basic Cleaner Grease + Oil)
